HEAVY- DUTY SNOW & ICE CONTROL

“SDSL” LIGHT DUTY SIDE DUMP SPREADER DUMP BODY SERIES

Conveyor uses 667X type pintle chain at 12” wide with 3/8” x 1-1/4” flites on 4-1/2” centers. The conveyor is self cleaning drag chain powered through a 10:1 reducing gearbox and hydraulic motor.

Optional Equipment

- ▶ **“SDSL” screen package.**
- ▶ **18” polymer spinner.**
- ▶ **Fold up ladder.**
- ▶ **Ladder (2 steps).**
- ▶ **Oval light kits.**
- ▶ **HI-temp tilt floor wiper.**
- ▶ **Airgate kit (if equipped with air compressor).**

Unique chain tensioner automatically adjusts chain tension. The conveyor chain runs smoothly through our two roller chain tensioning device. Tension is maintained with two tension springs, which reduce stress to the conveyor chain unlike conventional tensioners.

Spinner assembly is adjustable to allow you to spread material where you want it. The hydraulically powered spinner disc is 18” diameter with six (6) vanes. The spinner assembly can be removed for summer use. The polymer chute is hinged to the front driver’s side corner of the spreader body.

“SDSL” side dump spreader body can be used either as a salt and sand spreader application or as a conventional dump body. The dumping action is achieved by the use of a direct mounted 8” bore by 21” stroke double acting cylinder.

Models Available

SDSL bodies are available in 9’ and 10’ lengths. 9’ and 10’ bodies include 15” sides, 20” tailgate. Steel and 304SS models available.
