

MID MOUNT WING SERIES

“QUALITY by DESIGN”

Everest Heavy Duty Mid Mount Wing System

Improves chassis weight distribution over front and rear axles.

Increased vision of side wing from passenger side mirror.

The side wing is tight to the chassis in travel mode.

Spring loaded wing arm helps reduce side impact shocks to chassis.

Rear mounted wing lift cylinder for better wing control.

Front and rear built in wing float mechanism to allow the side wing to follow the road surface.

Heavy duty front 16” slide wing post with direct lift hydraulic cylinder.

Front mount spring loaded wing trip dee designed to allow the side wing to trip forward to overcome road obstacles in plowing path.

Minimizes potential wing and chassis damage.
